

## **Introduction to Computers and Programming**

**Thursdays: 11:20-12:20**

**Grade Level: 3-6**

**Teacher: David Falke**

**Student Fee: \$80**

**Class Size Limit: 15**

**Course Description:** Elementary school students will develop basic computer technology skills, knowledge and competencies that will enhance their ability to use a computer. The course provides hands on activities to teach students basic computer skills such as typing, programming, and using Microsoft Word and Excel. Students will learn basic programming concepts and have an opportunity to build programs and games using Scratch, which was developed by MIT.

**Note:** Depending on class size or the collective interest of students enrolled, focus on a specific unit maybe expanded or reduced to accommodate the class' interest and depth of each subject. The intention is to cover the information above, but is subject to change.

**No Required Materials**
